Wavelet-Based Time–Frequency Analysis of Evolving fluids in a Microfluidic Rheometer

Subject:	Meeting with Supervisor
Group name/ identifier	Group 24
Meeting Location, Date & Time	Location:- Melbourne Connect, Level 2, Meeting room number: 2201 Date : 2nd April 2026 Time: 1pm to 2pm
Group members present	XINGCAN WANG, Rohan Mathew, Ria Mishra, Xuan ZHANG
Apologies	

1 Actions from previous meetings

Task	Who is responsible	Deadline
Read shared papers and come up with problem statement, objective and aims.	Team	
Requirement Analysis	Team	
Questions regarding requirements and information like rheometer.	Team	
Guidance, structure, planning for saving code and data for requirement analysis in github	Jianhao Zhang	
Tracking of papers assigned to read and putting together literature review structure	Xuan ZHANG	
Testing with data found for requirement analysis	Rohan and Ria	
Different methods to try with data and literature review ie like wavelet,fourer,ann	Jianhao Zhang and Xingcan Wang	
Error Metrics and Benchmarks based on the problem statement developed	Xuan ZHANG	

Task	Who is responsible	Deadline
Understand the following concepts: Fourier, Wavelets	Team	
Read Shared Paper	Team	
Understand the following concepts: Fourier, Wavelets	Team	
Research Wavelet types + parameters	Team	
Literature Review and how to write one	Team	
Begin Coding Experience	Team	

Copyright © The University of Melbourne

Create a Teams Channel	Rohan Mathew	

2 Items discussed and decisions made

Item	Decision (if applicable)
Reviewed the feedback given by host on the problem statement, aims and goals.	
Discussed paper on Fourier and wavelets	

3 Agreed actions from this meeting

Task	Who is responsible	Deadline
Update the problem statement, aims and objectives	Team	
Trial with dataset	Team	
Bench marks for the methods and algorithms	Team	

4 Next meeting

Location	Location:- Melbourne Connect, Level 2, Meeting room number: 2201
Date & Time	Date : 16th April 2026 Time: 1pm to 2pm
Goals	Problem Statement, Objective, Aim, Requirement Analysis
