Minutes of Meeting

Subject:	Meeting with Dr Ragil Krishna from Haemograph
Group name/ identifier	Group 24
Meeting Location, Date & Time	Online on Microsoft Teams Date –13 August 2026, Time – 12 pm to 1 pm
Group members present	Jianhao Zhang, Ria Mishra, Rohan Roy Mathew, Xingcan Wang, Xuan Zhang
Apologies	

1 Items discussed and decisions made

Item	**Decision (if applicable)**
Research direction	Further discussed the overall research direction of the project, with emphasis on connecting the characteristics of the data, relevant physical phenomena, and wavelet-based analysis.
Thixotropy	Discussed the concept of thixotropy and its relevance to the current research problem, particularly how thixotropic behaviour may relate to the characteristics and interpretation of the data.
Literature review	Reviewed the assigned research papers in relation to the current project, focusing on their practical contribution rather than simply summarising each paper.
Methods from literature	Identified potentially useful methodologies, preprocessing techniques, modelling approaches, and research ideas from the reviewed papers.
Application to project	Ragil encouraged the team to evaluate the practical value of each paper and identify which methods or ideas could be adapted or incorporated into the project.
Project workflow	The literature review should be directly connected to the project's research needs, with relevant approaches considered for preprocessing, wavelet analysis, modelling, and interpretation.

2 Agreed actions from this meeting

Task	Responsible	Deadline
Review assigned papers with emphasis on their practical contribution to the project	Each member	Before next meeting
Identify useful methodologies and analysis techniques from the literature	Each member	Before next meeting
Identify relevant preprocessing and modelling approaches that could be adapted	Each member	Before next meeting
Consider how the reviewed methods could be incorporated into the current project workflow	Team	Before next meeting
