Minutes of Meeting

Subject:	Meeting with Dr Ragil Krishna from Haemograph
Group name/ identifier	Group 24
Meeting Location, Date & Time	Online on Microsoft Teams Date –8 October 2026, Time – 12 pm to 1 pm
Group members present	Jianhao Zhang, Ria Mishra, Rohan Roy Mathew, Xingcan Wang, Xuan Zhang
Apologies	

1 Items discussed and decisions made

Item	**Decision (if applicable)**
Blood rheology analysis	Reviewed the transient and stable stress responses in step-up and step-down experiments. The results demonstrated clear differences between the two phases across blood samples.
Model validation	Evaluated the published rheological model against experimental data. The model captured step-up responses but showed limitations in predicting slow stress recovery following step-down transitions.
Feature extraction	Discussed the relationships between step size, direction and rheological features, including overshoot, undershoot, initial slope and settling time.
Model limitations	Identified difficulties in representing both rapid structural breakdown and slow recovery using a single structural parameter. The physical interpretation of these limitations requires clearer explanation.
Synthetic data analysis	Presented the preliminary design of ten synthetic datasets covering different rheological behaviours and data quality conditions. These will be used to compare signal-processing methods.
Presentation preparation	Reviewed preliminary findings and discussed how to communicate the key results and model limitations more clearly. A mock presentation was proposed before the final submission.

2 Agreed actions from this meeting

Task	Responsible	Deadline
Refine the explanation of model limitations and their physical interpretation.	Team	Before next meeting
Improve the presentation of rheological features and experimental findings.	Team	Before next meeting
Continue developing synthetic datasets and comparing analysis methods.	Team	Before final presentation
Incorporate feedback and prepare for the mock presentation.	Team	Before final submission
