Minutes Template

Subject:	Meeting with Krishna Ragil from Haemograph
Group name/ identifier	Group 24
Meeting Location, Date & Time	Online on Microsoft Teams Date – 1st May 2026, Time – 9 am to 10 am
Group members present	Jianhao Zhang, Ria Mishra, Rohan Roy Mathew, Xingcan Wang, Xuan Zhang
Apologies	

1 Actions from previous meetings

Task	**Who is responsible**	**Deadline**
Prepare requirement analysis draft	Team	
Prepare stakeholder analysis draft	Team	
Review problem statement and objectives	Team	

2 Items discussed and decisions made

Item	**Decision (if applicable)**
Requirement analysis refinement	Requirement analysis was refined to improve clarity and physical relevance. Features were made more quantitative, harmonics linked to nonlinear behaviour, and transition points redefined for blood clotting using viscoelastic changes (G′, G″). TB was set as method-dependent, frequency range updated to 0.1–10 Hz, and distinction between behaviour and causes was emphasised.
Stakeholder analysis structure	Confirmed three sections: analytical framework, stakeholder map, and stakeholder profiles
Stakeholder prioritisation	Haemograph identified as primary stakeholder; supervisors and student team as secondary
Integration into framework	Requirement and stakeholder analysis to be combined into a weighted scoring system for method selection
Evaluation criteria focus	Accuracy, nonlinear sensitivity, and noise robustness identified as key priorities

Deliverables alignment	Final method must demonstrate measurable outputs such as resolution and SNR, consistent with requirements

3 Agreed actions from this meeting

Task	**Who is responsible**	**Deadline**
Update requirement analysis table based on feedback	Team	
Revise transition criterion using viscoelastic definition	Team	
Refine stakeholder analysis (mapping, profiles, priorities)	Team	
Develop weighted scoring framework combining requirements and stakeholder input	Team	
Define measurable evaluation metrics (e.g. SNR, resolution, sensitivity)	Team
