Minutes Template

Subject:	Meeting with Krishna Ragil from Haemograph
Group name/ identifier	Group 24
Meeting Location, Date & Time	Online on Microsoft Teams Date – 17th April 2026, Time – 9 am to 10 am
Group members present	Jianhao Zhang, Ria Mishra, Rohan Roy Mathew, Xingcan Wang, Xuan Zhang
Apologies	

1 Actions from previous meetings

Task	**Who is responsible**	**Deadline**
Define problem statement, aim and objectives		
Start literature review and identify key features	Team	
Explore open-source datasets	Team	
Build fundamentals of rheology, Fourier and wavelets	Team	

2 Items discussed and decisions made

Item	**Decision (if applicable)**
Noise vs Signal	Need to clearly separate useful signal from noise; avoid losing important transient information
Data & Features	Focus on raw data (e.g. ROTEM, TEG); extract key features like frequency, amplitude, and time changes
Information Loss	Current methods may remove useful signal when filtering noise
Algorithm Comparison	FFT and wavelet are different; need common criteria for fair comparison
Evaluation Framework	Use metrics like accuracy, resolution, SNR, sensitivity, and processing time
Selection Strategy	No perfect method; choose the best one based on application and trade-offs

3 Agreed actions from this meeting

Task	Who is responsible	Deadline
Review literature on noise, signal processing, FFT and wavelets	Team	
Explore ROTEM and TEG datasets and assess suitability	Team	
Identify key signal features and potential missing features	Team	
Define minimum benchmark criteria for algorithm selection	Team	
Develop evaluation metrics framework and scoring system	Team	
Investigate real-time processing feasibility and FPGA constraints	Team	
Compare FFT and wavelet methods	Team	
Define common parameters for fair comparison between methods	Team	
Analyse trade-offs between accuracy, sensitivity, SNR and computation cost	Team
