Minutes Template

Subject:	Meeting with Krishna Ragil from Haemograph
Group name/ identifier	Group 24
Meeting Location, Date & Time	Online on Microsoft Teams Date – 27th April 2026, Time – 9 am to 10 am
Group members present	Jianhao Zhang, Ria Mishra, Rohan Roy Mathew, Xingcan Wang, Xuan Zhang
Apologies	

1 Actions from previous meetings

Task	**Who is responsible**	**Deadline**
Define problem statement, aim and objectives	Team	
Start literature review and identify key features	Team	
Explore open-source datasets	Team	
Build fundamentals of rheology, Fourier and wavelets	Team	

2 Items discussed and decisions made

Item	**Decision (if applicable)**
Project Direction	Shift focus from method comparison to developing a quantitative decision-making framework for method selection
Requirements & Data Analysis	Define quantifiable performance metrics (e.g. frequency, amplitude, SNR, resolution, processing time, robustness) and analyse noise, filtering effects, and information loss using multiple datasets
Implementation Strategy	Develop a unified Python pipeline with consistent preprocessing and parameter control to enable fair comparison; evaluate performance, robustness, and validate using real rheometer data
Evaluation Framework	Adopt a three-stage process: (1) screening with minimum criteria (pass/fail), (2) quantitative scoring of metrics, and (3) trade-off analysis using weighted evaluation
Parameter Consideration	Include effects of sampling rate, window size, filtering strategy, noise levels, and repeatability in method evaluation

3 Agreed actions from this meeting

Task	Who is responsible	Deadline
Prepare Draft 3 of the problem statement document	Team	
Finalise requirement analysis with clearly defined essential criteria	Team	
Conduct stakeholder analysis and prepare structured stakeholder questions	Team	
Establish Phase 1 pipeline to enable pass/fail screening of candidate methods	Team	
Define evaluation criteria and quantify key performance metrics using datasets	Team	
Document datasets used and methods/algorithms applied for each	Team	
Prepare inputs for Phase 2 evaluation (including metrics and preliminary data)	Team
