Wavelet-Based Time-Frequency Analysis of Evolving fluids in a Microfluidic Rheometer

Subject:	Meeting with Supervisor
Group name/ identifier	Group 24
Meeting Location, Date & Time	Location: Not recorded Date: 14 October 2026 Time: Not recorded
Group members present	Rohan Mathew, Jianhao Zhang, Xuan Zhang, Ria Mishra, Xingcan Wang (Alex). Supervisor: Saumya.
Apologies	None

1 Actions from previous meetings

Task	**Who is responsible**	**Deadline**
Revise slides to connect the project goals, methods, results and conclusions.	All members	Reviewed at this meeting
Practise the complete presentation and reduce technical narration.	All members	Rehearsal held

2 Items discussed and decisions made

Item	**Decision (if applicable)**
Timed rehearsal	The team rehearsed the presentation. Saumya considered timing manageable and visuals good, but the content remained too dense for an audience unfamiliar with the project.
Overall structure and length	Reduce the roughly 25 slide deck towards 18 slides, with a maximum around 20. Organize the story around motivation, problem, methods, key results and conclusions rather than separate semester summaries.
Data and technical explanation	Explain the dataset and sampling limitations near the beginning. Combine low-level workbook/worksheet slides, use a group voice and define abbreviations at first use. Justify the selected test protocols.
Evidence and validation limits	Distinguish measured blood relevance from synthetic known-event recovery. A later check questioned matching conditions in an earlier instrument comparison. Treat synthetic tests as validation support and avoid claiming a universal wavelet advantage.
Figures and results	Align chart and slide fonts, simplify unclear plots and connect each result to its question. Combine conventional analysis slides, simplify step-response summaries and remove duplicated real-versus-synthetic explanations.
Reconciling feedback	Client feedback sought more technical explanation, while Saumya emphasized accessibility within 15 minutes. Retain necessary detail but explain methods at a high level and prioritize the assessment rubric.
Final revisions and review	Meet as a group to restructure the deck and share revised slides with Saumya. The next client review was moved to Friday at 12:00; no further supervisor meeting date was confirmed.

3 Agreed actions from this meeting

Task	**Who is responsible**	**Deadline**
Hold a group meeting to restructure the deck and reduce slide count.	All members	Before final presentation
Combine data preparation slides and move dataset context earlier.	Jianhao and team	Before next review
Simplify conventional metrics slides and explain unfamiliar terms.	Xuan and team	Before next review
Simplify step-response figures into clear question, result and conclusion statements.	Rohan	Before next review
Clarify real/synthetic validation and qualify instrument comparison claims.	Ria and team	Before next review
Remove duplicated conclusions and explain method performance in relation to data properties.	Xingcan (Alex) and team	Before next review
Standardize fonts, define acronyms and share the revised deck with Saumya.	All members	Before final presentation

4 Next meeting

Location	Not recorded
Date & Time	Client review: Friday 16 October 2026 at 12:00 (date inferred; am/pm not explicit). Next supervisor meeting: not recorded.
Goals	Review the revised presentation, resolve client feedback and finalize an accessible account of the findings.
