Wavelet-Based Time–Frequency Analysis of Evolving fluids in a Microfluidic Rheometer

Subject:	Meeting with Supervisor
Group name/ identifier	Group 24
Meeting Location, Date & Time	Location:- Melbourne Connect, Level 2, Meeting room number: 2201 Date : 16th April 2026 Time: 1pm to 2pm
Group members present	XINGCAN WANG, Rohan Mathew, Ria Mishra, Xuan ZHANG, Jianhao
Apologies	

1 Actions from previous meetings

Task	Who is responsible	Deadline
Update the problem statement, aims and objectives	Team	
Trial with dataset	Team	
Bench marks for the methods and algorithms	Team	

2 Items discussed and decisions made

Item	Decision (if applicable)
Ria presented the updated Problem Statement, Aims and Objectives	
Xingcan Presented benchmarks based on the papers for Wavelets and dataset	
Jianhao presented and talked about wavelets	
Xuan presented paper on colloidal gels	
Rohan presented python notebook on the analysis of rheometer data showcasing fourier problems, how wavelets help to solve it, why add ann on top of it and chirp method as well

3 Agreed actions from this meeting

Task	**Who is responsible**	**Deadline**
Update the problem statement, aims and objectives and add sub objectives	Jianhao	
Benchmark for fourier and wavelets and its attributes	Xingcan	
How gel and gelation property can be measured	Xuan	
More research on how window methods(wavelets) help the problem.	Jianhao	
To do more analysis with datasets that show gelation features	Rohan	

4 Next meeting

Location	Location:- Melbourne Connect, Level 2, Meeting room number: 2201
Date & Time	Date : 23rd April 2026 Time: 1pm to 2pm
Goals	Problem Statement, Objective, Aim, Requirement Analysis
